

# CONCUSSION

## ***EVO NEUROLOGICAL THERAPY for CONCUSSION***

Evo Neurological Soft Tissue Therapy is a therapy system that targets the neurological origin and neurological components of a concussion, allowing for **COMPLETE RAPID RECOVERY** and **ACCELERATED ELIMINATION** of **SYMPTOMS**. All injury is a direct result of the body's inability to absorb force. With everything we do, our body absorbs and generates force. In order to absorb force appropriately to maintain healthy tissue and avoid injury, muscles must fire in the appropriate order at the appropriate force and velocity. When an individual sustains a concussion, it means the body had a neurological inability to absorb that force. The nervous system was not able to communicate to the appropriate muscles fast enough in order to absorb force appropriately. Force does not simply disappear; if there is a neurological disconnect where muscles do not work efficiently, the force is absorbed in the wrong areas; in this case, the head, leading to a concussion.

Symptoms and severity of a concussion vary from person to person; however, what is commonplace in all concussions is that the control center of the body, the brain and nervous system have lost the ability to communicate with the rest of the body appropriately. Signals from the brain to any area: muscles, organs, hormones, etc. can be dramatically compromised or completely turned off. Resetting and reestablishing appropriate signals is a complex process and should be taken very seriously. If it is not, there is a potential for future injury in others area of the body and continued free-radical buildup in the brain.

Neurological Soft Tissue Therapy (NST) is a system that treats the neurological origin of the concussion and reestablishes efficient communication of the brain to the rest of the body. Symptoms of a concussion vary widely, from headaches, fatigue, and dizziness, to cardiovascular and respiratory problems. Treating these symptoms will not take care of the neurological disconnects of the brain; recovery would be minimal and the individual would still be prone to future injury. NST treats the origin of the concussion. This will allow the body to absorb force as a whole, heal itself, and establish an elevated resistance to injury. It will allow the physiological symptoms of the concussion to quickly **VANISH** and recovery to be dramatically accelerated! This is done by putting the body back into neurological balance, eliminating neurological disconnects and compensation patterns, and establishing appropriate 'muscle memory' in order that the brain can work with the rest of the body efficiently. If you have a concussion, do not hesitate to come to a **FREE CONSULTATION**.

**In January 2013, Gregory suffered a severe concussion. Symptoms: 3+ debilitating headaches/day, fatigue, & dizziness for over a year until Evo Neurological Therapy Jan, 2014. Within 2 weeks, SYMPTOM FREE.**

### **UTILIZED BY:**

NFL: 650+ Athletes  
NBA: 200+ Athletes  
MLB: 100+ Athletes  
NHL: 200+ Athletes  
MLS (European Soccer): 600+ Athletes  
Olympians: 25+ MEDAL Winners  
NCAA: 500+ NCAA Athletes
