

# JOINT PAIN

## **EVO NEUROLOGICAL THERAPY for JOINT PAIN**

Evo Neurological Soft Tissue Therapy is a therapy system that targets the neurological origin and components of pain & injury, allowing for **COMPLETE RAPID RECOVERY** and **ACCELERATED ELIMINATION** of **SYMPTOMS**. All pain & injury is a direct result of the body's inability to absorb force. With everything we do, our body absorbs and generates force. In order to absorb force appropriately to maintain healthy tissue and avoid injury, muscles must fire in the appropriate order at the appropriate force and velocity. When an individual sustains joint pain (mild or severe), it means the body has a neurological inability to absorb that force. The nervous system is not able to communicate to the appropriate muscles fast enough in order to absorb force appropriately. Force does not simply disappear; if there is a neurological disconnect where muscles do not work efficiently, the force is absorbed in the wrong areas, aka the **JOINTS**. This will lead to pain or injury. The spot where you feel pain is not where the problem began. The appropriate muscles are turned off and the joints are taking the brunt of all we do. The pain begins with the neurological disconnect; simply, where the muscle did not or could not do what it was supposed to do. Therefore, the area you feel pain takes the force and can potentially be damaged.

Neurological Soft Tissue Therapy is a three-part system that treats the neurological origin of pain & injury. Simply treating where the problem ended will not take care of the neurological disconnects; and, recovery will be minimal and the individual will still be prone to pain and future injury. Treating the origin of pain will allow the body to absorb force as a whole, heal itself, and establish an elevated resistance to injury. It will allow the physiological symptoms to quickly **VANISH** and recovery to be dramatically accelerated! This is done by putting the body back into neurological balance, eliminating neurological disconnects and compensation patterns that lead to joint pain, and establishing appropriate 'muscle memory' in order that the body can work at high load, volume, and velocity. Muscles are meant to absorb force, not joints. If you have joint pain, do not hesitate to come to a **FREE CONSULTATION**. Live and perform to the level you want; eliminate symptoms and avoid injury.

**Chris Loughney, Professional PGA Golfer, severe shoulder pain which kept him from swinging a club for 8 months, fluidly and painlessly swung a club within the first 20min of Evo Neurological Treatment.**

### **UTILIZED BY:**

NFL: 650+ Athletes

NBA: 200+ Athletes

MLB: 100+ Athletes

NHL: 200+ Athletes

MLS (European Soccer): 600+ Athletes

Olympians: 25+ MEDAL Winners

NCAA: 500+ NCAA Athletes
